

PROJECT DESCRIPTION: Assisting the RCRAInfo Team in designing, developing, documenting, and testing of a national system

Describe program (mission/objectives):

Our mission is to protect human health and the environment by ensuring responsible national management of hazardous and nonhazardous waste.

Our goals are to:

- Conserve energy and resources by promoting waste reduction, reuse, and recycling ;
- Prevent land contamination from mismanagement of solid and hazardous wastes;
- Clean up areas where waste may have spilled, leaked, or been improperly disposed.
- Promote safe waste management by working closely with individual states, industry, environmental groups, tribes, and the public. These shared responsibilities help us to:

Define project(s), objective(s) and tasks/assignment(s):

Project(s): Work with the Office of Resource Conservation and Recovery's (ORCR) RCRAInfo Team in designing, developing, documenting, and testing of a national system.

Objective(s): To support the national hazardous waste management system along with its user base.

Task(s)/assignment(s): Working with ORCR RCRAInfo developers on software development, documentation, and testing.

Identify prerequisite qualifications: Computer programming skills are required. Knowledge in web application development is desirable. An understanding of java programming language is preferred.

Describe any other requirements such as travel or training: If you know there will be travel costs associated with conferences or training, please make sure to list details and costs here: NA
